

NEWS OF THE MORNING.

The trial of Sergeant Mason, who fired at Guiteau, begins on Monday next.

Boston contracted yesterday for a hundred electric lights.

Ko Kun Hua, the Chinese Professor at Harvard University, died yesterday of pneumonia.

John E. McDonough, the actor, died in Philadelphia yesterday morning of cancer in the throat.

The Commercial Advertiser's Washington special asserts that Sargent and William E. Chandler will soon enter the Cabinet.

John C. New, who was Tuesday nominated for Assistant Secretary of the Treasury, was General Spinner's successor as United States Treasurer, and during the last Presidential contest was the efficient chairman of the Indiana campaign committee. He is owner of the Indianapolis Journal, and ever since Garfield's election has been spoken of for a Federal appointment, the last position for which he was booked by current gossip being the mission to Russia.

SANITARY.

Among the discoveries of modern investigators, none are of greater importance to men than that we have learned in regard to the causes of certain diseases. When children die in crowded tenement houses to which bad milk has been distributed, we no longer say that it is a sad providence, but dirt and foul air and bad milk; when diphtheria, scarlatina and typhoid fever sweep off young and old, the intelligent physician knows that there is bad drainage, water contaminated with sewerage, or perhaps vegetables rotting in a cellar under the house. These diseases are all capable of being transferred from one person to another through minute organisms that are thrown off from the body of the sick, or pass away in the excretions. But it is highly probable that these organisms are developed in all forms of decomposing matter under suitable conditions, hence to have an outbreak of diphtheria, or any of the diseases named above, it is not necessary that a case of any of the diseases be imported for a starter. When once these little organisms are developed by any mass of filth and are taken into the human body they immediately begin to multiply with a rapidity that is astonishing, and soon the blood and every tissue is poisoned. The fever that is lighted up is only an evidence of what mischief is being done in the whole body. Different organs are attacked with different degrees of severity, and take on forms of action peculiar to their structure. Thus in diphtheria and scarlatina the throat suffers most, while in typhoid fever it is Bruner's glands in the small intestine. The point we wish to teach in regard to all these diseases so justly dreaded by every community, is that they are the result of the introduction into the body of a specific organism that is a poison, and that these organisms are sprouted and grown in every form of decomposing matter. The grandest fields for their growth are cess pools, sink drains or ponds, and sewers that are not kept clean and well ventilated. Look around your premises and see if you are not raising a crop of disease with which to slay your own or your neighbors' children. If you sow disease ought you to complain if you reap with death? In our next we will try to show how the organisms are introduced into the body.

CORRECT.

The Alta says: If any man imagines that the province of a party paper is simply to register its edicts, or support its candidates or officials through thick and thin, he is woefully mistaken. A paper that is good enough to help to elect men, is also good enough to criticize their conduct after election.

Thom's sentiments exactly. If one party elects a man to office, every member of the party has a personal interest in seeing that the duties of the office are well done, and a special privilege to criticize.

The Stock Report says: "As a matter of course, the bill to reduce the tax on spirits is a Democratic measure and was introduced by a gentleman from Kentucky. It proposes to amend the revenue laws by reducing the tax on distilled spirits to fifty cents per gallon. This would make whisky come just forty cents per gallon cheaper, which would effect a considerable saving in the expenses of house-keeping in Kentucky and other Democratic States."

At a young ladies' seminary recently, during an examination in history, one of the pupils was interrogated thus, "Mary did Martin Luther die a natural death?" "No," was the reply, "he was excommunicated by a bull."

SPLINTERS.

During the last four years Oregon has exported to the Eastern States not less than 400,000 head of beef cattle. Most of these cattle were produced in the counties east of the Cascades.

In San Diego about twenty new buildings are being erected. Among these are the Masonic and Odd Fellows' building to cost \$20,000, and a new public school house costing \$12,000.

Laborers at Seattle, W. T., are receiving from \$45 to \$60 per month and board. There are two coal mines, five sawmills, three foundries, two machine shops and a furniture factory there.

The Commissioner of Agriculture, in his last report, estimates 7,000,000 people in this country as directly engaged in agricultural pursuits. Farms and farm implements are worth \$13,461,200,433.

This is how the Lewiston (Me.) Gazette got in a ball notice: "A grand firemen's ball will be given at City Hall on the evening preceding Birkington's Wash Day. The entire fire department has consolidated in the management, and a mastodon time is anticipated."

Extract from a young lady's letter: "And do you know, Maud and I are quite sure that Captain Popple had taken too much champagne at the ball, for he took out his watch and looked hard at the back of it and then muttered, 'Bless my soul! I hadn't any idea it was that time of night.'"

A passerby was badly injured the other day by a trunk thrown from a window in the top floor of the Baldwin. When arrested by the thrower, the thrower, to the surprise of every one, refused to offer a plea of emotional insanity. He merely put in evidence the instructions of his physician requiring him to throw out his chest.

We remember once recording the fact that a little boy said that soda water tastes like your foot's asleep; but now comes a boy who says that Weiss beer is thawed sand-paper. This reminds us of a Yankee on the Pacific Ocean who for the first time got a mouthful of Chile peppers. When the tears dropped he gasped, "For the love of Heaven, no more needles and pins on toast."

Why Nevada Mines Lie Idle.

The following letter published in the Virginia Chronicle needs no comment, it speaks for itself. The Chronicle correspondent says:

That capital can find a more profitable field than Nevada, is clearly shown by the following letter, written by the agent of a New York syndicate, sent to the Pacific States to purchase a mine and conduct operations on a large scale. Having fought in the same battles with Mr. V. during the late war, he kindly permitted me to copy it.

WHY A NEVADA MINE LIE IDLE.

ELKO, April 1.
Messrs. ——— & Co., New York City.—GENTLEMEN: In obedience to instructions I have secured the refusal of three mines, one in Utah at \$100,000, one in California at \$100,000, and one near Elko in this State at \$50,000. The mines are of equal promise, judging from the quality and quantity of ore, etc., and I was about to advise that we purchase the Nevada property, considering the price—\$50,000—in its favor (an item of too much importance to be overlooked) but I came near being the victim of a very serious blunder.

Upon inquiry I learn that the railroad through this place is all powerful and works wonders in a mysterious way. We would require about 30 car-loads of machinery for a suitable plant, and for some reason which I am unable to explain, they charge \$800 per car to this point, while we can ship at \$300 per car to California or Utah. Thirty carloads at \$500 extra per car aggregates \$15,000 against the Nevada mine. This trifling sum might be overlooked, but pushing investigation further I was astonished to learn that the company charges such exorbitant rates on general supplies that the miner is compelled to exact one dollar per day more for his labor here than in Utah or California. We would require a force of 300 men on the mine and a 40-stamp mill, and this excess of one dollar per day would amount to \$108,000 per year, and turns the scale largely in favor of Utah or California.

You will observe from the above that the railroad company would not only absorb the \$50,000 saved by differences in original cost but an additional \$73,000 the first year. This, together with the fact that this State collects a tax from all bullion produced within her borders, together with a high rate on improvements, and the certainty of having to pay this railroad company such extortionate rates for an indefinite period, renders the purchase of the Nevada property entirely out of the question, and I leave for Utah by the next train. Knowing mines and mining to be the sole dependence of this community, and that such discrimination must effectually blockade capital at the State line, I ventured to ask a citizen how this people managed to live. He answered: "Playing poker and running for office."

Yours respectfully,
HERB VON BLANK, M. E.

The Idaho Statesman, a Democratic paper published at Boise City, Idaho, comes out with a long editorial in defense of the Mormons and polygamy. The article was written by three Mormon bishops who were members of the last Idaho legislature. They say that the Mormons vote the Democratic ticket because it is their right to do so and it is the right of the party to receive and its duty to defend them.

Rapid Breathing as an Anesthetic.

Dr. M. T. Yates, in a letter published in the Biblical Recorder, says of the surgical operations to which he has recently submitted:

"My doctors said that they had seen it stated by an American doctor that if a person would breathe as rapidly as possible under an operation, he would not feel the pain of cutting, and they wished to try it on me, to which proposition I assented. Dr. Macleod superintended the breathing—which was like that of a dog on a hot summer day—holding out of my sight a handkerchief in his hand to be dropped as a signal—when he saw the color come in my face—for Henderson, the operating doctor, to go ahead. When Macleod told me 'That will do,' I was surprised to find that the operation had been performed. This I have tried three times, and have not at either time felt more pain than is usually inflicted in the case of vaccination. I heard the knife rip through the flesh, like the sound produced in cutting leather, but I did not feel the pain. What is the philosophy of this kind of an anesthetic? Is it simply a diversion of the mind? We presume the rapid breathing acts very much like the inhalation of laughing gas; that it oxidizes the blood more highly and makes the heart beat faster, as shown by the color in the face, and this exhilaration produces insensibility to pain. A man slightly wounded in battle often does not know it at the time—partly, perhaps, because of mental preoccupation, but mainly, we suppose, because he is toned up by the excitement of the conflict. But, whatever may be the explanation, Dr. Yates' experience is an instructive instance of the connection and interaction of bodily estate and mental sensibility."

The Mines of Michigan.

A comparatively small, narrow part of the State of Michigan, skirting its whole extent on the north by Lake Superior, and on the south, in large part, by Lakes Michigan and Huron, and known as the Upper Peninsula, in little more than a quarter of a century, has contributed to the realized mineral wealth of the country nearly \$300,000,000 in ingot copper, pig iron and iron ores. Of this immense product, the iron mines have furnished nearly \$130,000,000. Last year, the copper produced was in value about \$10,000,000 and the iron about \$18,000,000, making a total of \$28,000,000, while the promise for 1892, both for copper and iron, is that the product will be greater.—Mining Record.

The Fitz John Porter Case.

Notwithstanding the well-directed efforts of Fitz John Porter and his friends to have his disabilities removed and to reinstate him in the army, their progress is not such as to afford encouragement that they will succeed during the present session of Congress. That body is overcrowded with business, besides which, certain members have prejudices against him which it will be hard to overcome. The President seems indisposed to take action in the premises, which leads the Providence Journal to remark that Logan, in this matter, "is more a power behind the throne than Grant."—[S. F. Call.]

An Encouraging Sign.

The Memphis Appeal is sure that a brighter day has dawned upon that region of the South. It discovers that sectional prejudices are vanishing, and "with them the hatreds and narrow ideas of the past." It says: "Intelligence, reason and common sense are ready to make available some of the resources which science and experience have brought within reach." This is as it should be. The country has receded far enough from the civil war to have forgiven and forgotten its animosities.—[S. F. Call.]

They are trying the "Put and Call" game in wheat, at San Francisco, but so far the business has been very slow. What a benefit it would be to the farmers of California to have all those old Mossey Bucks come out of Pauper Alley and run around the Produce Exchange, with their hands full of wheat, on which they would offer "options" on lots of ten bushels down to a peck?

There is more truth than poetry in the following item from the Beaver Times: "Ask some men for an advertisement or some locals, they answer they do not believe in advertising—a paper is never read. Let the man be caught kissing his neighbor's wife, or trying to hold up the side of a building some dark night, and his tune changes instantly, and if the printing office is in the garret of a seventeen-story building he will climb to the top to beg the editor to keep quiet—don't publish it in your paper, you know."

Do not be persuaded to buy a "Cheap John" piano, but purchase the Henry F. Miller piano, which is used by artists more than all the other makes combined.

M. J. STIMSON, Agt.

Have you seen those beautiful easel frames, statuettes, vases, toilet sets and other cases at Osburn & Shoemaker's?

Sewing Machines.

Can be bought cheaper at Osburn & Shoemaker's than elsewhere in Reno.

Picture Frames and Mouldings.

Can be bought for cost at Osburn & Shoemaker's.

Fifteen cents will get a paper of long-cut tobacco with rice paper thrown in at E. Meyer's.

Bird Cages and Feather Busters. A fine assortment just received at Osburn & Shoemaker's.

Notice.

If you want pianos and organs, or music books, sheet music, or anything in the music line you will please call on Brookins. We can safely say that Mr. Brookins has the nicest assortment of pianos, organs sheet music, music books and every thing in the music and variety line we ever saw outside of any of the larger cities; and for prices he beats San Francisco or any house on the coast. His instruments come direct from the East, and he has the agency of thirteen different factories. Brookins can supply you with any make you desire. See his B. F. Baker upright piano which is never out of tune. Price \$375. See his Nevada organ, the finest parlor organ in the world, price \$175. Brookins fully guarantees everything, and trades new instruments for old ones, allowing just what the old ones are worth. Mr. Brookins does all kinds of repairing to organs, pianos and all other musical instruments at very low prices. Try Brookins, and you will get your moneys worth. Address or call at C. J. Brookins' piano waterworks, Reno, Nevada.

SHERIFF'S SALE.

IN THE DISTRICT COURT OF THE SECOND and Judicial District of the State of Nevada, in and for Washoe county.

A. H. MANNING and W. F. BERRY, Plaintiffs,

vs.

THOMAS MOORE, Defendant.

Under and by virtue of an execution issued out of the above Court duly tested the tenth (10th) day of February, 1892, and to me directed and delivered on said 10th day of February, 1892, on a judgment recovered in said above named Court by the above Plaintiffs and against Thomas Moore, for the sum of seventeen thousand seven hundred sixty-one and 96-100 dollars (\$17,761 96) with costs now amounting to \$381 95, and interest, I have this day levied upon and describe personal property heretofore levied upon by me by virtue of a writ of attachment issued in the above cause:

1 Locomotive engine
1 Tender.
1 Caboose car.
9 Flat or Gravel cars
5 Construction cars.
1 Lot Railroad Timbers.
30,000, More or less, Railroad Ties.
1 Lot Picks.
1 Lot Shovels.
1 Lot Bars.
1 Lot Bledges.
1 Lot Miscellaneous Railroad Tools.
2 Rubber Cars or Trucks.
7 Stoves and Utensils.
1 Cabin.
Also the following described capital stock of the Nevada and Oregon Railroad Company, a corporation, standing on the books of said Company in the name of Thomas Moore, to-wit: Certificate Number one, issued May 30th, 1881, for 1,000 shares.
Certificate number five, issued May 30th, 1881, for forty (40) shares.
Certificate number six, issued May 30th, 1881, for eight hundred (800) shares.
Certificate number seven, issued May 30th, 1881, for one hundred five (105) shares.
Certificate number nine, issued May 30th, 1881, for one hundred forty (140) shares.
Certificate number twelve, issued May 30th, 1881, for twenty (20) shares.
Certificate number thirteen, issued May 30th, 1881, for twenty (20) shares.
Certificate number fourteen, issued May 30th, 1881, for twenty (20) shares.
And I hereby give public notice that on Saturday the 18th day of February, A. D. 1892,

At eleven (11) o'clock A. M. at the Board House of the above described Nevada and Oregon Railroad Company, at Reno, Washoe County, Nevada, and about the railway track of said Company, in Washoe County, Nevada, I will sell at public auction to the highest and best bidder so much of the above described property as may be necessary to satisfy this writ of execution, and also a writ of execution issued out of the above Court on a judgment recovered therein by H. J. McMurray, against the above named Plaintiff for the sum of \$9,506 75, with costs taxed at \$14 10, and interest thereon from date hereof until paid, at the rate of ten per cent per annum. Terms of sale: Cash in hand in United States gold coin.

W. A. WALKER, Sheriff of Washoe County, Nevada.
Dated, Sheriff's Office, Reno, Nevada, February 10th, 1892.
R. JOHNSON, Att'y for Plaintiff.
Wm. WALKER, Att'y for Defendant.

SHERIFF'S SALE.

IN THE DISTRICT COURT OF THE SECOND and Judicial District of the State of Nevada, in and for the County of Washoe.

H. NATHAN VS. D. PEYSER.

Under and by virtue of an execution issued out of the above Court and on a judgment recovered by M. Nathan against the above named defendant, for the sum of \$900 01, and costs taxed at \$10 12, and by him assigned to Julius Baum & Co., for a valuable consideration, and
An execution issued out of the Justice Court of Reno Township, Washoe County, on a judgment in favor of Frank E. Horn and by him assigned to Julius Baum & Co., for the sum of \$100 00 and costs amounting to \$37 85, and
An execution issued out of the Justice Court of Reno Township, Washoe County, on a judgment in favor of Manning and Berry, and by them assigned to Julius Baum & Co., for the sum of \$30 61 and \$10 35 costs of suit.
I have this day levied upon and hereby offer for sale in the manner required by law the following described personal property, to-wit: The entire stock of goods consisting of dry goods, clothing, boots and shoes, and a general assortment such as said Peyser kept in his store on the west side of Virginia street, in Reno, Nevada, the said sale to take place at the store of said Peyser aforesaid in Reno, Nevada.

On the 13th day of February, A. D. 1892.

At 10 o'clock A. M., when and where I will sell so much of the above described stock as may be necessary to satisfy said above mentioned executions. Terms of sale cash in hand.

W. A. WALKER, Sheriff Washoe County.
Reno, Feb'y 6th, 1892.

The above sale is hereby postponed to Friday the seventeenth (17th) day of February, 1892, at the same hour and place.

W. A. WALKER, Sheriff, Washoe County.
Reno, Feb'y 11th, 1892.

ASSESSMENT NOTICE.

Office of Nevada and Oregon Railroad Company, Reno Nevada.
Notice is hereby given that a meeting of the Board of Directors of said Company held this day, for the purpose of assessing one dollar per share was levied and called in upon each and every share of the Capital Stock of said Company payable to John Sunderland Treasurer of the Company at his Office in Reno, Nevada, within thirty days from this date. All shares upon which said assessment shall not be paid on or before the 17th day of March, 1892, will be advertised and sold for such delinquency, by the Secretary of the Company according to law and the By-laws of the Company, and all such delinquent stock will be sold at the office of John Sunderland Treasurer, on the 18th day of April, 1892, at 2 o'clock P. M. of said day, pursuant to law and the By-laws of this Company and the resolutions of its Board of Directors.
TRENOR COFFIN, Secretary of the company.
Office of the Company, Reno Nevada, February 14th, 1892.

TOWN AND COUNTY.

Mrs. Berry was reported somewhat better yesterday afternoon.

Lisle Jamison was taken quite sick yesterday and had to quit work.

Dave Lachman has been very sick for a week or two but is getting better now.

Charles Davis, the popular traveling agent for firms in San Francisco, was in town yesterday.

Susanville, Cal., has a girl sixteen years old who weighs 270 pounds, and is still growing.

Jake Graff was reported very sick yesterday afternoon. Typhoid pneumonia is the trouble.

Dan McMahon, the man convicted of setting fires at Verdi, was sentenced to three years in the State Prison.

Geo. Smith, Sr., vs. Logan et al. touching the rights to the water in Galena creek, occupied the District Court yesterday.

Yesterday was a beautiful day, almost warm enough for a thunder storm. Where is there a climate that can compare with ours—for variety.

California people are highly pleased over the late rains. The storm was general throughout the State and will be of great benefit to the farmers.

The Eureka Sentinel announces that the Eureka Consolidated Mining Company is to receive \$100,000 from the Richmond Company in the compromise between the two companies.

Dr. Hutchins says that R. Buckley is getting along as well as can be expected. Dr. Wagar went down yesterday, and fixed a plate in the mouth to hold the teeth and a fragment of the upper jawbone in place.

While a resident of Reno and his family were eating dinner yesterday afternoon, a stone crashed through a window pane, tore a hole in the curtain, and just missed some of the parties in the room. Boys you must be more careful or you will hurt someone.

The ladies of the Women's Temperance Union wish to announce that any washing sheets, pillow-slips and masks can leave their order at Brookins' and the same will be ready at the Reform Club Hall on Monday and Tuesday next.

W. R. Chamberlain had the fountain reservoir cleaned out yesterday and several of the fine trout placed there last Summer were found dead. The live fish were taken out until the cleaning was over and then put back. Those that had got through the winter seemed healthy and were as lively as river fish.

We commence in the JOURNAL this morning the publication of a series of short papers on the sanitary condition of Reno, and how to improve it. The papers will be written in plain language avoiding technical terms so far as may be, and will do to read all over the State. We shall endeavor to make the papers correct and in harmony with the latest investigations and reports.

An Honest Celestial

A Chinaman who works for Pete French found the pocketbook (advertised in the JOURNAL some days ago) and returned it to the White House yesterday afternoon. There were some forty dollars in it besides other valuables, and when Abraham opened it found everything O. K. The Chinese was liberally rewarded for his honesty.

Poor Billy.

Harry Wilson was terribly grieved yesterday by the loss of his pet goat. The poor fellow died night before last, and his taking off was so sudden that no definite opinion as to his disease could be arrived at. He and Harry were great friends and had many pleasant romps together. Billy had his good qualities, some of which were eating the show-balls as far up as he could reach and chewing the crackers off of the whips about the stable. Harry and his boy friends buried Billy yesterday properly and he is now rustling for another goat.

Musical Rehearsal.

The sixteenth rehearsal of the Department of Music of Bishop Whitaker's School for Girls will be held next Friday evening at 8 o'clock. It has been proposed to place in the school some memorial of Miss Sill, and to raise money for this object an admission fee of 50 cents will be charged to this rehearsal. The character of the rehearsals that have been given is a guarantee that this one will be of a high order. Seats will be reserved for all holders of tickets. Tickets for sale at the Postoffice, Allen's book-store and Nasby's Bazaar.

Fire Meeting.

C. A. Bragg was elected Chairman of the meeting and Mr. Kraus, (Nasby) was elected Secretary. J. B. Williams stated that the Department had a steamer, hand engine and apparatus for a good fire department and were out of debt and what they wanted, was men to form companies. D. B. Boyd read disbursements for two years of 1880, and 1881. J. B. Williams stated the amount that could be raised by taxation at 1/4 of 1 per cent and the amount now in the Treasury. He did not think that a paid department could be supported now. Chas. Knust moved that a steward be hired to keep the apparatus in order, attend the engine, stay at the engine house, attend to the cisterns and other work in and about the department and be paid \$80 per month. J. L. McFarlin thought that it was more necessary to get the machines to a fire and get men to work them and after the fire get the apparatus housed. The steward was an after thought and should be considered after the company is formed. R. P. M. Kelly thought that two companies should be formed one for the steamer and one for the hand engine. Chas. Knust thought it would be well to offer a premium of \$250 to any drayman who would get to the engine house haul the engine to the fire and after the fire take it home. Mr. Thyes favored Mr. Kelley's proposition, also have an additional house for one of the companies and have a hose company formed, each with its own foreman and a Chief over the whole. J. L. McFarlin suggested that the premium to be offered to the draymen should be made \$500 when it was a fire and when it was a false alarm \$250. Knust stated the contract that had been let for the building of cisterns and the progress of the work.

The original motion relative to the employment of steward was withdrawn. R. L. Fulton believed in forming two volunteer companies, let there be two foremen elected and they to choose their men from the volunteers, McFarlin thought it better to let the men come forward and agree to join a company and let them choose their own machine to run with. McFarlin's suggestion was agreed to. Mr. Fulton moved that a committee of three be appointed to canvass the town for volunteers. Carried. The committee appointed R. L. Fulton, H. L. Fish, J. S. Shoemaker and H. J. Thyes was added to the committee. L. J. Flint moved that a meeting be held for next Tuesday night to hear report of committee. The meeting adjourned.

Soda Deposits.

The Philadelphia Mining Journal says: "Soda, which is now imported at a cost of from \$52 to \$55, can be taken from the soda lakes of Wyoming and placed in the Eastern markets at a cost not exceeding \$25 per ton. The Wyoming soda is chemically pure than the imported, and the method and rate of supply indicate practical inexhaustibility. Means are now being taken to secure early access to these deposits, and when these are perfected our import totals will permanently lose an annual item of from \$6,000,000 to \$7,000,000." In Nevada crystallized soda can be dug up as ice is dug from a pond, except in the case of soda no one knows how far it is to the bottom of the pond. Out near Ragtown there is an inexhaustible supply of pure soda extending down to an unknown depth. On the surface of the ground are two or three feet of sand, but below this lies the soda, looking like a solid mass of ice. It was this soda that gave rise to the early days when the emigrants were crossing the plains—to the stories that in places on the plains there was to be found, under a few inches of sand, a solid mass of ice. The soda as dug up from the plain in sheets, from two to three inches in thickness really does look more like ice than does any other natural mineral formation.

The Insane Convict.

A State officer who recently visited the State Prison on Sunday last was shown John J. Combs, the alleged insane convict. That gentleman stated to a Carson Appeal reporter that it was his impression that Combs is as crazy as a man can get. He is very violent, and makes frantic attacks upon any one coming within reach. It is said he has not tasted a bit of food in eleven days. When food is handed him he flings it at the person waiting on him. He does not speak, but appears to be in a semi-insane all the time. If Combs is not insane he certainly possesses the strongest will-power ever heard of. He is still chained to the wall of the tailor shop, and paces up and down the length of his chain for hours at a time.

AN ARREST.

China Charley, Mr. Schooling's cook was arrested by Officer Avery last night and charged with stealing a watch. He had taken the watch to be repaired and there were suspicious circumstances connected with the transaction, so the arrest was made. Charley soon produced the owner of the watch, who said everything was all right and Mr. Schooling gave security that the Chinaman would appear this morning so he was allowed to go.

Musical.

The following programme has been arranged by Miss Quaille for the sixteenth musical rehearsal at the Bishop's school, which takes place on Friday evening next:

In the "Bugle Song," Prof. Cara gives the bugle echoes with his daughter May.

Donation Party.

Dr. Scott was taken by surprise last Sunday when at the close of the morning service one of his members announced a donation party at his residence at Lake's mansion Friday night next. Arrangements have been completed for a very pleasant evening. Prof. Stinson and Mrs. Taylor will have charge of the musical and literary entertainment, and it will be very fine. Dr. Scott has made many friends outside of his church, as well as in, and all are invited. The ladies will furnish refreshments. Parties are requested to leave any articles not convenient for them to carry, at the Baptist Church, Friday afternoon, and Mr. Sanders will call for any articles on Friday if notified. Dr. Scott has worked hard to free his church from debt, also encouraging and cultivating the literary and musical interest of Reno, and in promoting every noble enterprise in our midst. We have no doubt but that the public appreciation will be shown in a rousing benefit. Let every body go even if you can't stay all the evening, and enjoy all the good things, drop in and shake the Doctor by the hand and bid him God speed, all that can will meet at the Baptist Church at 7 o'clock.

A Good Book.

Ella McNeely is canvassing Reno for Gaskell's compendium of Forms. It is a book that every young man and boy should have. It embraces a complete self-teaching course in Penmanship, Bookkeeping, English composition, business law and commercial forms, complete dictionary of all legal and commercial terms and a great deal of valuable information. Encourage the young lady by subscribing for a volume.

Miss Parkinson's Concert.

Remember that there will be a special train to Carson and return, on Friday evening to allow Renosites to attend the entertainment for the benefit of Miss Parkinson. The young lady has arranged to reserve seats at the theater for all of those who will go. It is hoped that a party will be made up to attend the concert at Carson that evening.

Bucklen's Arnica Salve.

The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, tetter, chapped hands, chilblains, corns, and all kinds of skin eruptions. This salve guaranteed to give satisfaction in every case or money refunded. Price 25 cents per box. For sale by R. E. Queen, west side of Virginia street, Reno.

Put it to Proof.

At a time when the community is flooded with so many unwholesome devices and concoctions, it is refreshing to find one that is beneficial and pure. So conscious are the proprietors of Dr. King's New Discovery for Consumption, of the worth of their remedy, that they offer all who desire a trial bottle free of charge. This certainly would be disastrous to them did not the remedy possess the remarkable curative qualities claimed. Dr. King's New Discovery for consumption will positively cure asthma, bronchitis, stubborn coughs, colds, phthisis, quinsy, hoarseness, croup, or any affection of the throat and lungs. As you value your existence give this wonderful remedy a trial by calling on R. E. Queen, druggist, and obtaining a trial bottle free of cost, or a regular size bottle for \$1.

A COUGH, COLD OR SORE THROAT should be stopped. Neglect frequently results in an incurable Lung Disease or Consumption. BROWN'S BRONCHIAL TROCHES do not disorder the stomach like cough syrups and balsams, but act directly on the inflamed parts, allaying irritation, give relief in Asthma, Bronchitis, Coughs, Catarrh, and the Throat Troubles which Sloggers and Public Speakers are subject to. For thirty years Brown's Bronchial Troches have been recommended by physicians, and always give perfect satisfaction. Having been tested by wide and constant use for nearly an entire generation, they have obtained well-merited rank among the few simple remedies of the age. Sold at No. 10, a box everywhere.

Is there anything more refreshing than a nice hot bath before you dress up? Go to Paehner's and try his hot, cold and shower baths; clean tubs; plenty of towels.

50 CTS. A WEEK.

AYER'S HAIR VIGOR

FOR RESTORING GRAY HAIR

To its Natural Vitality and color

Advancing years, sickness, care, disappointment, or hereditary predisposition all tend to the hair gray, and either of them incline it to shed prematurely. AYER'S HAIR VIGOR, by long and extensive use, has been proven that it stops the falling of the hair immediately, and often renews the growth; and always surely restores its color, when faded or gray. It stimulates the nutritive organs to healthy activity, and preserves both the hair and its beauty. Thus, brassy, weak or sickly hair becomes glossy, pliable and strengthened; lost hair regrows with lively expression; falling hair is checked and established; thin hair thickens, and faded or gray hairs resume their original color. Its operation is sure and harmless. It cures dandruff, heals all humors, and keeps the scalp cool, clean and soft—under which conditions, diseases of the scalp are impossible.

An astringent for ladies' hair, the Vigor is prepared for its grateful and agreeable perfume and valued for the soft luster and richness it imparts.
